

4/2/10

How much do you spend on laundry detergent every year? My guess is that you don't even want to think about it! I know when I added up what we were spending to wash our clothes every year, I wish I hadn't...yikes! A new company, [Oransi](#), has set out to help consumers save up to \$100/year with the introduction of their new Laundry washing ball!

What is Robby Wash?

[Robby Wash](#) is an all new laundry ball that uses a unique technology incorporating macro-molecules (or tiny balls for lack of a better word) designed to be used in both cold and hot water! Simply toss the Robby Wash ball in your washing machine and it goes to work cleaning your clothes and saving you money!

Key Features:

- Hypoallergenic and great choice as a baby laundry detergent cleaner or for someone with sensitive skin
- Cleans and protects your clothes
- Guards fabrics against oxidation and discoloration caused by chlorine in the water, and maintains your clothes' springiness
- Eliminates unpleasant smells thanks to its antibacterial action

Robby Wash saves you money!

Each Robby Wash contains 10 oz. of macro-molecules, this is equivalent to 1200+ ounces (75+ lbs) of washing powder. This is clearly my favorite feature of the Robby Wash! We do a lot of laundry and I'm spending around \$20/month on laundry detergent. Let's times that by 12 for a total of \$240! One Robby Wash will last you 1 year and....wait for it..... it's just \$32.95! If your not jumping up and down right now, there may be something wrong with you! This equals a savings of \$208.05!

Our Experience

Savings this big made me a little skeptical, so when the Robby Wash arrived I was eager to put it to work and see how this ball really performed. Right out of the box the Robby Wash comes equipped with a filled ball and 3 refill packs, as well as a stain stick. I wasn't putting too much thought into the stain stick as I just figured it was a bonus added in and probably wouldn't really do much. So I grabbed one of my favorite Hannah Anderson dresses that Big Pea just spilled red PUNCH all over...OMG can you imagine my heartbreak when I noticed the punch...and I swiped the stain stick all over the areas that were soiled with punch. I then threw the dress along with the Robby Wash into the washing machine and awaited the results.

Tick, Tock, Tick, Tock!

I pulled the dress out to find not just one or two of the spots gone, but every single spot had literally disappeared. I suddenly Heart my [Robby Wash](#) and that magical little stain stick that came inside! I was thrilled that I didn't have to place another ridiculously priced order for the same dress! You can see the results for yourself!

I was also a little skeptical about how the clothes would smell once they were washed with the Robby Wash and I was pleasantly surprised that my clothes smelled better than they have in a long time! The Robby Wash has a very subtle smell, but it's a clean smell and this mama likes that! Robby Wash is also hypo-allergenic which means it's safe for newborns, children and...well...everyone in the family! Robby Wash is safe, simple, economical and good for the environment! We have found our product!

Buy it!

You can purchase your very own Robby Wash for just \$32.95 by visiting www.oransi.com and you'll find 2 different colors once you arrive. The **Pink Robby Wash** is intended for cooler temperature washes for advanced cleaning power on dark clothing and the **Blue Robby Wash** is intended for both cold and hot water washes and should be used on washes that will reach temperatures of 90F or above.
